

# Lititz Precision Products

**The Freedom** is a programmable automatic parts cleaner available in 4 jar (80mm) and 5 jar (64mm) formats. Parts are automatically transferred from the load station, through each ultrasonic cleaning/rinsing station and then the drying station. The automatic operation allows the operator the “freedom” to do other tasks while the machine is automatically cycling. Fully programmable for agitate strength, ultrasonic on/off, and time in each station. Designed, fabricated and assembled in the USA.  
Retail \$7495

**The Diver 125** is a wet pressure tester to check the water resistance of wrist watches to a pressure of 125 atmospheres (bar) or 1250 meters below sea level. Extremely durable, ruggedly built, simple, maintenance-free design. Approved by Omega for unlimited accounts. Designed, fabricated and assembled in the USA.  
Retail \$3595

**The Diablo** water resistance tester functions by drawing a vacuum over the watch. The operator watches for bubbles to exit the watch which shows the location of the leak. The watch is removed from the water before the vacuum is released, preventing water from entering the case. Vacuum is much more effective at locating leaks than pressure testers. Designed, fabricated and assembled in the USA.  
Retail \$1250

**The Matador** is an ultrasonic watch and small parts cleaner. It consists of four stainless steel cleaning/rinsing cups with one moveable ultrasonic transducer head, and a variable speed/variable temperature dryer. Small 8 oz. cup size for economical cleaning solution utilization. Dual timers for dryer and ultrasonic. Comes with stainless basket for pocket and wrist watches. Designed, fabricated and assembled in the USA.
